# Tucson Speedway Legend and Bandolero Rental Program

# LEGEND

It was in April of 1992 that the first Legends Car was unveiled at the Charlotte Motor Speedway. The concept of creating a fun and affordable "spec" class of racing for anyone to participate in was born. Legend Cars are 5/8-scale fiberglass full-fendered versions of the famed NASCAR modifieds driven by legendary drivers such as Fireball Roberts, Buck Baker, Curtis Turner, Speedy Thompson and Banjo Matthews.

Since that time, the Legends Cars have become one of the fastest growing segments of motorsports today. With drivers being classified into four different divisions, Legends Cars is THE racing opportunity that is available to anyone! The Pro Division is for the experienced drivers. The Masters Division features drivers 40 years and older. The Semi-Pro Division is the novice class, featuring the drivers that are new to the sport or have been inactive in other forms of racing for a while. Then there is the Young Lions Division which is designated for the drivers between the ages of 12 and 16. Since the car stays the same from division to division, it is the driver that makes the difference!

## SPECIFICATIONS

### LEGEND

- WHEELBASE 73.00"
- OVERALL WIDTH 60.00"
- OVERALL LENGTH 10' 6"
- HEIGHT 46"
- ENGINE Yamaha 1250cc (sealed)

- ENGINE Briggs & Stratton Vanguard (sealed)
- DISPLACEMENT 570CC
- HORSEPOWER 30 HP
- WEIGHT 550 lbs.
- TIRES INEX Approved
- WHEELS 6" Spec Racing Wheel

# BANDOLERO

Using the same magic formula that made the Legends Cars the most mass-produced competition car in history, officials of USLCA have introduced the Bandolero Car. The Bandolero Car is a turnkey, spec-series racer designed for drivers as young as eight years old and the young-at-heart at any age.

The Bandolero Car serves as a stepping stone between a 1/4 Midget or kart and a race car that is simple for everybody to use. The driver operates a Bandolero in a similar manner to a kart with left foot braking. The car is equipped with a centrifugal clutch so the driver does not have to shift gears.

The Bandolero Car's motivation is provided by a thumping Briggs & Stratton 570cc Vanguard engine mounted behind the driver. Small modifications have been made to the engine to bring the once 20HP stock engine to nearly 30HP.
